Press release

Digital Stars Eurozone fund granted the Belgian "Towards Sustainability" label

After the French Label ISRin March, Digital Stars Eurozone fund has been granted the Belgian "Towards Sustainability" label. This second sustainability label is a further recognition of Chahine Capital's sustainable investment approach and its concrete achievements.

Delivered for a renewable period of one year, the "Towards Sustainability" label was developed by Febelfin, the Belgian federation of financial institutions, in collaboration with financial sector stakeholders and independent experts. The label has three requirements:

- -Transparency;
- ESG (environmental, social and governance) analysis on all portfolios;
- Exclusions with low thresholds, not only on coal but also on non-conventional fossil fuels.

The Digital Stars Eurozone sustainability analysis was carried out by the independent labelling agency CLA (Central Labelling Agency) and can be consulted at <u>Labelled Products | Towards</u> Sustainability.

Digital Stars Eurozone is a quantitative equity long only fund focusing on the Eurozone created in October 2018. In addition to quantitative stock selection models based on financial criteria, these are complemented by an ESG selection process that rates companies on the basis of ESG reputational risk as established by the specialised provider RepRisk, on the basis of ESG Risk Rating and Carbon Risk Rating by Sustainalytics, and also includes sector and normative exclusions. It is ranked Article 8 according to the European SFDR (Sustainable Finance Disclosure Regulation).

"This label demonstrates once again our commitment to responsible investment and our ambition to combine performance and responsibility in our investment solutions for the benefit of our clients," said Charles Lacroix, CEO of Chahine Capital.
